

Bach Hoa Xanh Ensuring Top-Quality Products, Reliability For The Lunar New Year 2024

On February 5, 2024 afternoon, Vice Chairman of Ho Chi Minh City Municipal People's Committee Nguyen Van Dung led a team of HCMC's department leaders to visit and discuss the supply of goods for the Lunar New Year 2024 market at Bach Hoa Xanh.

MWG Implements IoT (Internet of Things) System Over 100 Stores To Automate Operations And Reduce Power Consumption

Under the stewardship of the IT & Tan Tam Team, marks a new milestone in enhancing customer satisfaction, optimizing operational processes, and fostering energy efficiency, thereby mitigating environmental impact:

1. Automation & Energy Efficiency: leveraging automated systems to regulate temperature, lighting, and ventilation, resulting in substantial energy savings.

2. Consistent Customer Experience & Avoiding Temperature Shocks: Offering a consistent shopping experience at stores through temperature, humidity, and light sensors, ensuring minimal difference between the outside and inside of the store.

3. Operational Optimization: achieving notable energy savings of over 250,000 kWh in the first month of operation, implementing remote monitoring and management capabilities for efficient device oversight, facilitating early detection and resolution of equipment issues, and effectively managing assets.
